Jide Oyelayo

Software Engineer · London, UK

JideOyelayo0@gmail.com jideoyelayo.com linkedin.com/in/jide-oyelayo-246073193
github.com/jideoyelayo1

Software engineer working in Python and C# on search infrastructure and retrieval APIs, with machine-learning projects from neural networks to regression models.

EXPERIENCE

Software Engineer, Logos Research

Apr 2026 – Present

- Own and optimise the search service across more than 400,000 indexed items, using Python and C# to deliver fast, reliable retrieval at platform scale.
- Develop approximate nearest-neighbour (ANN) retrieval pipelines in Python, enabling agents to find relevant informalisation text across a large corpus.
- Build the data pipelines and APIs that connect ingestion, indexing and retrieval to the platform's Lean 4 formalisation workflows.

Freelance Software Engineer, Great Child Nursery

Aug 2025 – Sep 2025 · London, England

- Built the nursery website in React and TypeScript on Firebase, with client-side caching to cut database calls.
- Added a CMS-style editing interface.
- Wrote a Go API for the enquiry email workflows.

Junior Software Developer, Carbon & Finch

Jan 2024 – Jun 2025 · Surrey, England

- Developed and optimised SQL jobs that analysed large volumes of sales-order data.
- Moved sales-order and invoice APIs from SOAP to REST.
- Implemented unit tests with Python and C++ scripts in Azure DevOps.

Junior Software Engineer, IDEX Biometrics

Jun 2022 – Sep 2022 · Farnborough, England

- Developed a MATLAB client for analysing fingerprint-sensing biometric systems.
- Designed finger-detection scan firmware using C++ and Python.
- Documented five scanning methods to reduce troubleshooting time.

Technical Director, Engineers Without Borders University of Warwick

Jun 2021 – May 2022 · Warwick, England

- Automated society operations with UiPath and C#, saving more than three hours each week.
- Delivered more than ten hours of introductory AutoCAD teaching.
- Designed a PID algorithm for a modular heat exchanger.

PROJECTS

Low-Cost Smart Agricultural Sensing System

Mar 2023 · Arduino, MATLAB, React Native, REST APIs

- Built a sensing system for small-scale rice farmers in South Asia using an eight-fold decision tree.
- Led development of a React Native app covering market analysis, pest detection, and crop planning.

Machine Learning Rowing Tracker

Jul 2022 · Python, Flask, Firebase, Matplotlib

- Logged rowing sessions and predicted average speed from past sessions with linear regression.

Four In A Row AI

Apr 2022 · C++

- Built a four-in-a-row opponent using minimax search with alpha–beta pruning.

Neural Network Electronics Simulation

Apr 2022 · C++

- Trained a from-scratch neural network to model XOR, NAND, MUX, DEMUX, adder and flip-flop circuits.

SKILLS

Python, C#, C++, Machine Learning, Algorithms, SQL, Bash, C, CSS3, Electronics, Finance, FPGA, Git, GitHub, JavaScript, MATLAB, MySQL, Quantitative Analysis, React, Software Engineering, STM32, SystemVerilog, Terminal, Verilog, VHDL, Visual Studio Code

---

EDUCATION

University of Warwick

Sep 2019 – Jan 2024

Master of Engineering in Electrical and Electronic Engineering. Degree classification: 2:1. Engineering Horizons scholarship (ARM, UKESF).

Brampton Manor Academy

Sep 2017 – Jun 2019

A levels in Mathematics, Further Mathematics, Chemistry, and Physics. A*A*AA respectively.

Brittons Academy

Oct 2013 – Jun 2017

Secondary education. 11 grades from A* to B / 9 to 6, including Mathematics (8) and English Language (7).

CERTIFICATES

- Financial Derivatives: A Quantitative Finance View, Udemy, taught by Cameron Connell, Apr 2024
- Python for Finance: Investment Fundamentals & Data Analytics, Udemy, taught by 365 Careers, Apr 2024
- Machine Learning A-Z: AI, Python, Udemy, Mar 2024
- C++ Programming from Beginner to Advance 2024 Edition, Udemy, Mar 2024

Courses and simulations

- JPMorgan Chase & Co. Quantitative Research Virtual Experience Program, Forage, Sep 2023
- J.P. Morgan Software Engineering Virtual Experience, Forage, Sep 2023
- Goldman Sachs Software Engineering Virtual Experience Program, Forage, Apr 2021
